

DESCRIPTION

Nascom's N78C SHK Series is a 3/4" recessed standard door contact couple with the patented SHARK™ magnet. The set is designed for residential, commercial and industrial steel and wood door applications.

The N78C SHK is the installer's choice of contact configuration because the contact set is designed to cut installation times .. just a pinch of the springs installs the SHARK™ magnet permanently and the powerful rare earth magnet helps to prevent false alarms caused by shifting or warping doors.

The N78C Series is designed for installation in every type of hinged door including wood doors.

FEATURES

- SNAP FIT ON STEEL - NO GLUE REQUIRED
- TIME SAVING INSTALLATION
- 12" 22AWG WIRE LEADS
- WIDE GAP - N35 NdFeB RARE EARTH MAGNET
- ENCAPSULATED HERMETICALLY SEALED CONTACTS
- NO SILICON, NO MESS
- POLYPROPYLENE SWITCH HOUSING
- LISTED TO UL634 STANDARD

INSTALLATION INSTRUCTIONS

- Mark location for the switch on the door frame.
- Drill a hole for the switch using a 3/4" Hole Saw for steel doors or a Forstner bit for wood doors.
- Connect the switch leads to the alarm circuit conductors. Hold the wire leads (not the switch housing) when cutting and stripping to prevent damage to the switch.
- Feed the switch conductors into the hole and insert the switch housing pressing firmly until seated. Silicone may be used to secure the switch in wood doors.
- Test switch for correct operation and make sure gap performance is acceptable.
- Place a mark on the top edge of the door aligned with the center of the switch.
- Press the springs inward on the sides of magnet.
- Insert the magnet in u-channel in the top of the door centered with the alignment mark.
- Release the springs to secure the magnet and complete the installation.
